This is a real experience, the screen realistic, operating fever-level exciting, slightly terrorist elements VR shooting game.

Cataclysm virus spread rapidly throughout the city, the human survivors in order to protect the remaining resources. The survivors were tenacious to resist the constantly attack from zombies outside the security house.

Zombie will show up in different directions in the same time, after a while the emergence of boss-level zombie will appear, you can choose all kinds of weapons on the console, kill the all zombies before the they destroyed all destruction.

Zombie will make you very exciting when they are face you , but you are a human survivor, to eliminate zombie to save human being. You can pick up the weapons in front of you, of course, you can change the weapons in any time, and some of the weapons attack power is very strong, that means you must have a strong ability to control it, such as bow. All weapons are used to simulate the manipulation of real weapons, such as bullets loaded, replace the magazine, archery and so on. Take shelter protect you when you shooting.

There is alot of good game to be had here if you can get past the Russian audio.

The unofficial patch is a must have though.. Actually had fun with this. I really like this game and I'm surprised that I didn't know about it sooner. I haven't had any real problems and the only thing I'm not crazy about is that you have to collect a certian amount of seeds to move on. The levels look nice and are fun to play so the backtracking is not bad at all. Overall this is a really good game that feels like it could be in your SNES collection.. What you see is what you get, its an ok game, if you like what u see in the video\pics I recommend u get it but at a discounted price.. Pretty Good. Price is acceptable,

Gameplay is like that of the binding of isaac, it is really smooth

You get common, rare, and legendary weapons aswell as a random pickup in each stage.

you also get an end level bonus which is kind of nice.

From a single dev it is not too shabby, Vote up from me!. This is a game was not one of my better choices of buying. Played for about 15 minutes, then sat looking at the game for the next 45 minutes trying to figure out what the crap i was smoking when i purchaced this game. Oh me. You can be dumb at times. Look, if you are undecided when it comes to buying this game, just, no. Don't. Don't be me. It's boring and just stupid. The developers and this game are not worth your money or your time. Now run along and buy something that is worth your money and time. Good day to you sir or ma'am.. no no no no guys no... the game play is really shoddy. The trailer got me PUMPED until I experienced the clunky controls :V Maybe this concept with Left 4 Dead would be otherworldly! But this game needs serious gameplay attention before I recommend it for its current price tag....

---

It's a good arcade game. Do you like space? Do you like Civ1 2 3 4 5? Then buy this game. Nope, the core mechanic of this game is just not clever and not very entertaining.. Okay so I noticed this game is in Beta which should mean the developer is about done with the game. I hate to say it but I do not see a difference. To start with most all the game is just the assets that come with the game engine. There is no extra. Then you get hit with well you need steel plate but how do you get steel plate? Well not going to find out in the game. That is fine though if I cared enough I would go looking for the info. Then you try to figure out all your can craft and well the menus are absolutely just whatever the game engine allows. Hard to find anything quickly without going through all the lists.

Finally I just gave up. The whole game seems to have been made by someone that put as little effort into the game as possible or they are a student that is not willing to push themselves. In the end the game is nothing I can not create myself with a free copy of the game engine. Really this is more of a hobby for someone and not a game. Free to play games offer much better content.

Well I wrote this review back in Nov 2016 and I have to say sadly at first glance the game has not changed. It is still an empty world where you start with an ice axe that is weird looking for an axe. Funny you chop down a tree and it falls on you.....Yeah 2 years and that is the thing that is backwards.

Clearly this dev is trying but it is not something I feel is a quality game. If you have a low end PC and most titles do not work for you....this game would be good for you. I can not imagine that it requires much for resource

Okay I have give this game every opportunity and then some. I have few hours on the game because it looks like crap. Even plays like crap. I have a i7 CPU and a 980Ti GPU with no issues running the game. The issue is that the game looks like it should be about 5yrs old.

The world is very empty what tree there are look so fake. To top it off today I gave it a try chopped down a tree and it fell right on me but I never moved!!

The game does not rate a long review so I will end it there. Many other games out there in this genre that are much much better.. Amazing.

More Michael, please.. Easy to get into, a surprisingly deep & original challenge. If you like board games you should pick this up in a sale or build a real board.. Suprisingly fun controls are a bit weird but after a bit u get the down
